

ECE367 Cheatsheet

Hanhee Lee

September 2, 2024

Contents

1	Vectors, Norms, Inner Products (Ch. 2.1-2.2)	2
2	Orthogonal Decomposition, Projecting onto Subspaces, Gram-Schmidt, QR Decomposition, Hyperplanes and Half-Spaces (Ch. 2.2-2.3)	2
3	Non-Euclidean Projection, Projection onto Affine Sets, Functions, Gradients and Hessians (Ch. 2.3-2.4)	2
4	Matrices, Range, Null Space, Eigenvalues, Eigenvectors, Matrix Diagonalization (Ch. 3.1-3.5)	2
5	Symmetric Matrices, Orthogonal Matrices, Spectral Decomposition, Positive Semidefinite Matrices, Ellipsoids (Ch. 4.1-4.4)	2
6	Singular Value Decomposition, Principal Component Analysis (Ch. 5.1, 5.3.2)	2
7	Interpretations of SVD, Low-Rank Approximation (Ch. 5.2-5.3.1)	2
7.1	Interpretation of SVD	2
7.2	Low-rank approximation	2
8	Least Squares, Overdetermined and Underdetermined Linear Equations (Ch. 6.1-6.4)	2
8.1	Least squares	2
8.2	Overdetermined linear equation	2
8.3	Underdetermined linear equation	2
9	Regularized Least-Squares, Convex Sets and Convex Functions (Ch. 6.7.3, 8.1-8.4)	2
9.1	Regularized least-squares	2
9.2	Convex sets and convex functions	2
10	Lagrangian Method for Constrained Optimization, Linear Programming and Quadratic Programming (Ch. 8.5, 9.1-9.6)	2
10.1	Lagrangian method for constrained optimization	2
10.2	Linear programming and quadratic programming	2
11	Numerical Algorithms for Unconstrained and Constrained Optimization (Ch. 12.1-12.3)	2
11.1	Numerical algorithms for unconstrained optimization	2
11.2	Numerical algorithms for constrained optimization	2

List of Figures

List of Tables

- 1 Vectors, Norms, Inner Products (Ch. 2.1-2.2)
- 2 Orthogonal Decomposition, Projecting onto Subspaces, Gram-Schmidt, QR Decomposition, Hyperplanes and Half-Spaces (Ch. 2.2-2.3)
- 3 Non-Euclidean Projection, Projection onto Affine Sets, Functions, Gradients and Hessians (Ch. 2.3-2.4)
- 4 Matrices, Range, Null Space, Eigenvalues, Eigenvectors, Matrix Diagonalization (Ch. 3.1-3.5)
- 5 Symmetric Matrices, Orthogonal Matrices, Spectral Decomposition, Positive Semidefinite Matrices, Ellipsoids (Ch. 4.1-4.4)
- 6 Singular Value Decomposition, Principal Component Analysis (Ch. 5.1, 5.3.2)
- 7 Interpretations of SVD, Low-Rank Approximation (Ch. 5.2-5.3.1)
 - 7.1 Interpretation of SVD
 - 7.2 Low-rank approximation
- 8 Least Squares, Overdetermined and Underdetermined Linear Equations (Ch. 6.1-6.4)
 - 8.1 Least squares
 - 8.2 Overdetermined linear equation
 - 8.3 Underdetermined linear equation
- 9 Regularized Least-Squares, Convex Sets and Convex Functions (Ch. 6.7.3, 8.1-8.4)
 - 9.1 Regularized least-squares
 - 9.2 Convex sets and convex functions
- 10 Lagrangian Method for Constrained Optimization, Linear Programming and Quadratic Programming (Ch. 8.5, 9.1-9.6)
 - 10.1 Lagrangian method for constrained optimization
 - 10.2 Linear programming and quadratic programming
- 11 Numerical Algorithms for Unconstrained and Constrained Optimization (Ch. 12.1-12.3)
 - 11.1 Numerical algorithms for unconstrained optimization
 - 11.2 Numerical algorithms for constrained optimization
